

NYBRO FIXED AND ADJUSTABLE HOISTS

Nybro Hoists have been designed here on the Sunshine Coast for ease of use, by the most frail of users. They are the result of a comprehensive assessment of the design features of hoists from around the world. From this, we have incorporated the **best ideas** and our own innovations to meet the needs of **Australian owners**. We have fully adjustable boom length and hoist angles for ease of loading, a carrying capacity of approximately **110kg lifting weight**, subject to boom length, industrial strength bearings in all rollers and needle roller bearings on the slew (left and right movement) shaft, so they don't wear out quickly.

The motor and gearbox are mounted at the base of the hoist to extend the height that can be achieved. The hoist is powdercoated in Satin Black to enhance the look and give it that extra bit of protection over paint. Each of our **Nybro Hoists** are engineered and custom designed to fit your vehicle. Our adjustable hoists can even fit into the boot of a car or a small hatchback. As an extra service, we can also make up individual brackets for your scooter to enable easy lifting into your vehicle.
