

NYBRO MRV ELECTRIC QUAD

Space Buggy

**Designed and Manufactured
here on the Sunshine Coast**

In this increasingly techno savvy world, **Nybro** have created a unique experience which helps to ignite a passion for science and technology in the children of today, in the form of the **Nybro Space Experience**. As the modern world becomes more and more reliant on science and technology for everyday functions, with computers, mobile phones, microwaves and DVDs, unfortunately children are less interested in the areas of science and technology that create the very machines on which we rely so heavily.

The Nybro Space Experience

Nybro has created the Space Experience to help counteract this phenomenon. Children are invited to participate in an interactive space training program, whereby they single-handedly operate the **Space Buggies** and then get to experience **MRVs (Mars Recovery Vehicles)**. We have created a hands on encounter that is relevant to today's society and which is also an exciting learning experience.

MRV Electric Quad SPECS

Drive Power

Motor	2 x 24v 1Kw
Batteries	2 x 12V - 28A/Hr
Batteries Max.	2 x 12V - 38A/Hr
Recharge Time	8 Hours
Charger	Switch Mode
Range Standard	35 Km on flat
Range Max	50 Km on flat

Mechanical

Chassis	All Aluminium
Suspension	Optional
Brakes	Electronic
Tyres	Pneumatic 11/710/6
Rims	5 x 150 Alloy

Specific Dimensions

Track Front	500mm
Track Rear	555mm
Wheel Base	650mm
Turning Circle	2620mm kerb to kerb
Ground Clearance	105mm
Seat Height	525mm

Overall Dimensions

Length	1090mm
Width	650mm
Height	785mm
Carrying Capacity	150kg
Weight	80kg
Max. Pre-set Speed	8 km/h

Inspiring and Educating

People are expected to be walking on the surface of Mars by the year 2017 and we are here to fulfill the wildest dreams of those children who fantasise about space travel. Who knows? maybe the very children who are firing up the jet turbine engines of the **Nybro MRV** today, could be the same ones walking on Mars in the near future. **Nybro** is here to inspire, educate and help children realise their dreams.

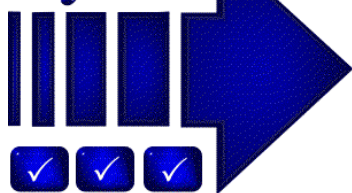

Realistic, Easy to Control

The **Nybro Space Buggies** are equipped with an electronic regenerative braking system that makes them not only the safest quad on the market but also the most environmentally friendly with no pollution and no noise. They are simple to control and designed to carry up to 150kg so they are fun for all ages. These indoor/outdoor vehicles are speed controlled and run on a track that simulates the Mars surface in order to create a realistic experience whilst protecting grass or flooring from damage.

Don't miss out on the technological revolution.

Become a part of the Nybro Space Experience today!
