To the President of the P & C Association,

A question we commonly share as individuals is how do we change our lifestyle to be eco-friendly. As adults our habits are often difficult to change, especially when the media has for so long reinforced the consumer way of life.

Fortunately, people are recognising the danger of heavily burdening our planet with pollution. We are aware of the need to change but there is real concern that the community as a whole is struggling to adopt a balanced lifestyle.

It is difficult to see the impact we make as individuals in a global sense, but I personally, strongly believe that as one man I can make a difference.

Three years ago I founded a company with the future intent to manufacture and produce products that are personally and environmentally beneficial. Our most recent product development has been designed with the next generation in mind, and will entice them to be enthusiastic about eco-friendly habits.

Nybro, a young company with new concepts and innovations has devised a unique solution to promote clean products that most importantly educates students. Our solution financially benefits their school as a whole, while assisting us in further research and development of new products for a healthier future.

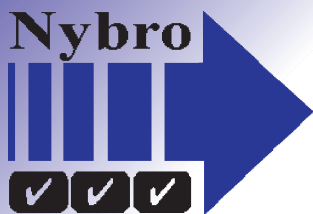

We are proud to announce "Project ATV"(All Terrain Vehicle), a project designed to promote environmentally sustainable living and simultaneously raising funds for your school or charitable organisation. Nybro releases a pre organised package containing all you need to run the newest and most exciting fund raising event realising approximately \$5000. This figure could be higher, subject to the number of ticket sales.

This raffle, "Project ATV", will unlike others, excite and enthuse students and your local community to participate because of its environmental focus which is of global importance to all. Daily, media reminds us either by weather reports or specific stories of our changing planet. Fortunately, this will encourage people to actively participate in your fund raising endeavours.

I have enclosed further details of "Project ATV", a brochure of the Venture ATV, a pre-paid envelope and a reply form to enable you to express your interest in this multi faceted fund raising package. Thankyou for your time and consideration for what I believe, is an inspiring activity for all involved.

Yours sincerely

Denver Vidler
Director

Project ATV logo

PROJECT ATV

“Project ATV” is a “hybrid” raffle. It facilitates fund raising for your organisation while introducing new and positive habits to the up coming generation, promotion of electric vehicles and education for all involved. All the hard work has been done for you in this complete package which includes absolutely everything needed for a smooth running and successful fundraiser.

The package will contain:

School Pack (one per school)

- Teacher registration form.
- Instructions for the distribution of Teacher Packs.
- Suggestions on the successful running of raffles and raffle guidelines.
- Copy of the Contract of Purchase.

Teacher Pack (one per teacher)

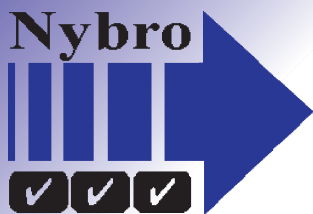

- Instructions for the distribution of Student Packs.
- Student registration form.
- Student packs for all students in the class.

Student Pack (one per student)

- Letter to parents explaining raffle.
- Brochure on the ATV-xm.
- One book of 10 Tickets.
- Individually identified resealing plastic bag to protect tickets and facilitate money collection.

Parent Pack (one per student)

- Follow up letter to parents.

PRIZES

1st Prize - One Venture ATV-xm (value \$5720).

2nd Prize - Solar Energy Kit plus book (value \$100).

3rd Prize - Solar Energy Kit plus book (value \$60).

The top 5 ticket sellers will have the opportunity to test ride an additional ATV that will accompany a Nybro Representative for supervised use on the day of the prize presentation. They will also receive a Venture ATV T-shirt.

The same representative will be available on the day to answer any questions and, if suitable to school policy, will give educational presentations to student groups on methods and examples of eco friendly living. This could also be coordinated with a visit from your local energy provider on how they are taking steps to promote new energy sources.

FURTHER INFORMATION

Each teacher will fill out the student registration form. This form will record the number of Student Packs issued and returned by each student.

The resealing plastic bag will include an identification tag, upon which each student's name is written. The tag will have school details already printed upon it. The bag will serve to keep the Student Pack together, to protect tickets and facilitate the return of all monies raised to the school or the P&C for fund allocation.

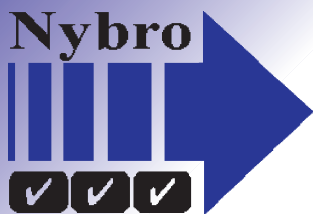

The letter to parents outlines "Project ATV" and why this "hybrid" raffle would be beneficial to the school and to the student's education on environmental issues. It encourages the parents to actively participate and would invite the parents to contact, if so desired, the school or the P&C to find out how the funds will be allocated. A date is also indicated for the closing of ticket sales and when the draw will take place. If the raffle has been sponsored by local businesses, then the sponsors would also be mentioned in this letter.

Brochures of the Venture ATV would be used to display the 1st prize and may be kept by students when all tickets are sold.

Tickets will be sold for \$2.00 each and are specially printed with your school name and phone number on them. A total of 5000 tickets will be printed, with these being bound into books of 10 for easy sale.

The follow up letter to parents is given to students to take home one week prior to the end of the raffle. This letter thanks them for help and is a friendly reminder to ensure the return of all collected monies by the due date.

More Student/Teacher Packs and tickets can be supplied for a small additional cost.

COSTS

Your school could afford this project with the temporary use of P&C and school funds, a sponsor or an underwriter.

We have two payment plans for your convenience.

- An initial deposit of \$2,500 is paid to start the project. When the deposit is received, we will then pass on to you all that you need to conduct the raffle. Ticket books, advertising brochures, all rules and instructions, as well as some great ideas to make it the most exciting fund raising project ever. The balance of payment is to be paid on completion of the raffle and before delivery of the prizes.

OR

- An initial deposit of \$1,000 is paid to start the project. When this initial deposit is received, we will then pass on to you all that you need to conduct the raffle. The remaining deposit of \$1,500 is to be paid within 30 days of the initial deposit. The balance of payment is to be paid on completion of the raffle and before delivery of the prizes.

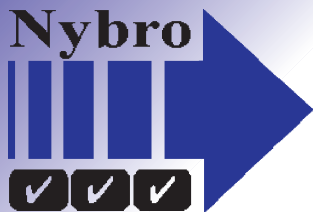

The total deposit of \$2,500 is approximately 25% of the expected gross income generated by the "Project ATV" raffle, it also equates to 50% of our costs.

This deposit could be paid directly from your available P&C or school funds. Alternately, local businesses could sponsor the project, increasing your raffle profits. In return, the letter that is sent to parents would mention the support and generosity of these businesses and their names would be displayed as sponsors upon the tickets.

If a sponsor could not be found, a business or individuals may wish to support the school and temporarily fund the project by the use of personal funds or credit cards. This deposit would be returned by the school or P&C, to the underwriter(s), at completion of the raffle and before any profit is allocated.

The total cost of "Project ATV" is only \$5,000+gst. Offset against an expected income of \$10,000 this fund raising project is both affordable and profitable.

The controlling parties must sign a contract with Nybro Holdings Pty Ltd. The contract will state the dates, time periods, and prizes offered by Nybro as part of the project costs. A Nybro representative will contact you to organize the arrangement and ensure that all the legal aspects of your raffle are in place.

INTRODUCTION KIT

This kit is a preliminary package for "Project ATV". It will include a compact disc with video footage of the Venture ATV and will demonstrate how safe and fun this electric All Terrain Vehicle is for all ages. A copy of each of the five different packs used and five copies of this document to facilitate a presentation to associated colleagues. A contract for "Project ATV" is included along with payment details. This kit costs \$34.95 (includes GST and postage). This cost will be refunded to you upon participation in this dynamic new concept.

SUCCESS

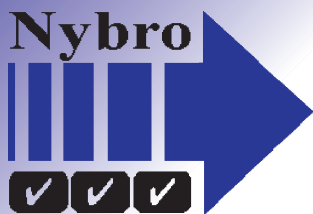

Recently I read a newsletter sent home with my year one son. The school principle had written an article in which he was expressing his delight at the wonderful cooperative spirit the students from the senior classes were showing. He believed the students had learnt to show great initiative and to spontaneously tackle tasks that need to be completed with courage. I'm sure the Principle was taking great pride and joy in seeing the fruition of his schools mission statement, "To provide quality education enabling our children to face the future with confidence". Along with seeing the students learning to take responsibility for their own actions, he was seeing these same students becoming role models for the younger students.

For this reason, I would like to compare the deposit for this fundraiser with these senior students. The school has provided the education and the platform for these students to expand and develop to their full potential. The deposit will allow you to expand and develop your fund raising ability to your highest level yet. I would like install confidence in you by acknowledging that "Focus and goal setting" intentionally pre-exists in the structure of "Project ATV". Let us ensure that the future of our children is one of health and sustainability.

WEB SITE

For more information on Nybro and "Project ATV" or if you have any further questions, simply complete the reply form and return it in the enclosed pre-paid envelope. We also invite you to visit our manufacturing facility on the Sunshine Coast in Queensland or you can log on to our web site at www.nybro.com.au. Dean Iddon from our Promotions Division is available to answer any of your questions.

Thank you again for your valuable time
